

SYSTEM SOLUTIONS FROM ONE SOURCE

ECOLAN®

25-Year System Warranty on Copper Cabling Systems:

SCOPE:

- 25-Year system warranty for proper installation of the INFRALAN® cabling system as well as the prescribed limit values
- In the case of a guarantee claim (proof by measurement protocols and further information) an analysis of the complained components and subsequent a remedial action is performed
- EFB-Elektronik shall bear the costs if the defect is attributable to the product. If the defect results from an improper handling of the product, EFB-Elektronik will reject the costs. EFB-Elektronik will not accept any downtime- or consequential costs.

REQUIREMENTS AND PREREQUISITES:

- The use of INFRALAN® or ECOLAN® installation material of EFB-Elektronik (for all relevant components in the network).
- Installation of the cabling system by an EFB-Elektronik-certified INFRALAN® installer who has successfully completed a corresponding EFB training (theory, practice, final examination).
- Signing the contract for the object to be installed.
- Compliance with the measurement limits (permanent link) required by the relevant classification.
- After finished installation, sending of all measurement protocols of the installation (permanent link) to EFB-Elektronik.
- Clear assignment of the installation with respective labelling (measurement protocol).
- Certification only for cabling links specified in the measurement protocol.

CERTIFICATION PERIOD OF THE INFRALAN® PARTNER:

- Three years
- The certification will extend through performed projects
